Agenda

• New Policy Ideas Generated from the Envision Cambridge Process
• 100% Affordable Citywide Overlay Analysis
• Development Projections Comparing Current Zoning and New Policy Ideas:
  • Super-inclusionary housing program
  • Environmental performance incentive
• Discussion and feedback
Planning Topics

- Community Wellbeing
- Housing
- Economy
- Urban Form
- Climate & the Environment
- Mobility
Hundreds of new policy and program ideas were generated from a wide-reaching engagement process

- Advisory committee and working groups
- Public workshops
- Street team events
- Focus groups
- Youth workshops
- Online and paper surveys
- Digital engagement
- Walking tours
Housing: What we heard from you!

- Increase existing City funds dedicated to affordable housing...
- Change zoning to enable more housing, including affordable housing, to be built along major corridors and in other transforming areas that have the capacity to accommodate growth...
- Create an incentive for developments to construct more affordable units than required
- Engage housing and service providers to produce quality permanent supportive housing for the homeless and other vulnerable populations
- Require the creation of significant new housing in areas that are being rezoned.
- Identify opportunities to require local academic institutions to use their assets, especially their land, to build more housing
- Offer density bonuses and relief from other dimensional regulations for fully affordable housing developments.
- Change base zoning to require that developers of multi-family projects...provide a certain amount of family-sized units...
- Evaluate gaps in supportive housing services provided by the City, increase capacity...to address identified gaps, and increase awareness of available services.
Economy: What we heard from you!

- Undertake targeted business recruitment efforts to attract firms that offer low barrier-to-entry jobs...
- Change zoning to increase density and achieve a mix of uses along Mass Ave. and Cambridge St. that builds the customer base for retail
- Explore financing mechanisms to support the industrial economy through infrastructure funding or land assembly, supporting firms that provide light industrial jobs, and encouraging the development of a manufacturing incubator space.
- Provide funding to help eligible businesses make marketing, interior, or exterior façade improvements
- Provide funding for STEAM internship opportunities for Cambridge students
- Expand capacity and funding to provide additional “earn and learn” opportunities with local employers for Cambridge residents...
- Conduct a needs assessment of the training and education needs of low/moderate income residents
- Implement vacant property activation strategies that support property owners with retail vacancies
Climate and Environment: What we heard from you!

- Develop disaster preparedness plans at the neighborhood level in conjunction with neighborhood organizations, service providers, public housing residents and other vulnerable populations.
- Incorporate green infrastructure into city sidewalk and street reconstruction projects as conditions and space allow.
- Procure 100% of municipal electricity from renewable sources.
- Develop an Urban Forest Master Plan that establishes tree canopy expansion and tree planting goals by neighborhood.

- Leverage new communication technologies to alert residents and workers, by geography, of risks in the event of an emergency (e.g. text message, smartphone app).
- Purchase additional land reserved to be used as open space.
- Offer a density bonus incentive for net zero projects.
- Establish a cool roof requirement for new construction in all zoning districts.
Mobility: What we heard from you!

- Develop an implementation plan and increase funding to complete gaps in the updated Bicycle Network Plan...
- Prepare transportation infrastructure to be more resilient to periodic flooding...
- Implement bus priority treatments on key bus corridors at points of recurrent delay to increase transit speed and reduce traffic delays.
- Install co-located carshare, bikeshare, and transit nodes in areas that are currently underserved...
- Increase funding to improve multimodal access to key public facilities...by adding crosswalks, bus shelters, bike lanes, and bike parking, etc.
- Increase funding to improve intersection safety in locations with high rates of crashes.
- Better manage freight movement and delivery to improve safety and efficiency...
- Carry out the Vision Zero Plan to meet the goal of zero fatalities and severe injuries.
Urban Form: What we heard from you!

- Build the connections to integrate “Alewife Square” into the fabric of the City…
- Establish development standards to promote street-activating uses (such as retail) on ground floors, including minimum ground-floor heights, limitations on the frontage length occupied by lobbies, etc….
- Design and implement clear wayfinding for biking and walking routes to the City’s open spaces and other destinations.
- Encourage family-friendly design in residential and commercial buildings and public realm improvements through development review (i.e. playgrounds, etc.)
- Eliminate minimum parking requirements for development along the corridors.
- Identify opportunities for increasing the amount of open space in or near growth areas
Support Community Engagement Team, a multi-agency collaborative that reaches out to underserved Cambridge families and connects them to community events and resources, develops community leaders, and supports agencies in working with a diverse community.

Expand City efforts, including targeted outreach and recruitment, to ensure diverse representation on City boards, commissions and advisory committees.

Research and implement innovative and non-traditional engagement tools and partnerships.

Adopt an urban agriculture ordinance to increase local food production.

Increase capacity to conduct ongoing racial equity analyses of new and existing policies, programs, services, procurement practices, and community engagement.
We want to test the effectiveness of priority zoning-related ideas

- Some recommendations have a large-scale, measurable effect on development and its outcomes across all planning topics.

- Additional analysis is needed to understand range of impacts.

Ideas to test include:
  - 100% affordable housing overlay
  - “Super-inclusionary” housing program
  - Environmental performance incentive

Members of the public discussed proposed recommendations at a public meeting in July.
Analysis of Working Groups’ New Policy Ideas
100% Affordable Citywide Overlay Analysis
100% Affordable Housing Overlay: Background

- The City already partners with affordable housing developers (usually local nonprofits).
  - Development is subsidized by federal, state, and city government.
  - “Affordable” means income-restricted housing affordable to low-, moderate, and middle-income people
  - Two or three projects are typically completed each year.

- The production of 100% affordable housing units is limited by the subsidy funding available.

- The 100% Affordable Housing Citywide Overlay:
  - would not change the total number of units that can be built
  - would expand the options for where to locate 100% affordable developments
  - would make it easier to get 100% affordable developments permitted

625 Putnam Ave is an example of a 100% affordable housing development built by a nonprofit developer in Cambridge.
What would the 100% Affordable Housing Citywide Overlay entail?

For 100% affordable housing developments only:

- Offer density bonuses and relief from dimensional standards (height, setbacks, open space) and parking where necessary (varies by zoning district)
- Allow for as-of-right approvals with required design review and community input instead of discretionary permitting approvals
- Allow affordable multi-family and townhouse developments in all districts (e.g. not currently an allowed use in Residence A and B districts);
- Allow for conversion of any existing structure (including non-residential) to affordable multi-family housing
- A design review process would ensure good design without creating uncertainty about a project’s fundamental viability

Four-story affordable development with family-sized homeownership units (821-825 Main Street).
Why study a 100% Affordable Housing Citywide Overlay?

• Challenges to building affordable housing:
  – High land costs and competition from market-rate developers
  – Appeal of discretionary approvals can add significant cost, long delays, and significant risk to affordable housing developers.
  – Density is limited in Residence A and B districts (single or two-family units), making high land costs per unit infeasible for government-subsidized developments

• 100% Affordable Housing Citywide Overlay would:
  – Remove permitting uncertainty and subsequent additional costs, delay, and risks
  – Enable affordable housing developers to better compete with market-rate developers
  – Expand affordable housing's viability in areas where it's been more difficult to create new affordable units
  – Help keep per-unit development costs within reasonable limits for affordable developers
Why study a 100% Affordable Housing Citywide Overlay?

**Advances Envision Cambridge shared community goals:**

- Foster neighborhoods of opportunity and equitable distribution of affordable housing citywide.
- Provide a variety of housing options for people of different socioeconomic levels, life stages, and physical needs.
- Expand affordable rental and homeownership opportunities to enable Cambridge to thrive as a mixed-income community.
- Provide access to opportunities for all people regardless of differences.
- Work toward addressing race-based disparities and racial equity.
- Maintain the existing patterns of the city through a mix of preservation and complementary infill development.
Where would the 100% Affordable Housing Overlay apply?

- The 100% Affordable Housing Overlay could apply to the entire city
  - In higher-density areas such as commercial corridors and areas of potential change, affordable developments would need 2.5 times the density allowed by current base zoning to be competitive in the market
  - In residential neighborhoods and other areas, affordable developments would need an FAR of 2.0 to be financially feasible in all areas
Examples of recent infill development in Cambridge

In these examples, the new developments are at a higher density than the surrounding buildings.
What would the 100% Affordable Citywide Overlay look like in residential neighborhoods?

100% Affordable Housing developments in residential zoning districts would take the form of mid-rise multifamily buildings, consistent with the historic mix of densities found throughout Cambridge.

Examples of hypothetical buildout on small parcels (<5,000sf):

- Maximum allowed under current zoning (many existing buildings are non-compliant) 2 units, 2 stories
- Example of buildout under 100% Affordable Citywide Overlay 7 units, 3 stories
- Example of buildout under 100% Affordable Citywide Overlay 8 units, 4 stories

69% of existing buildings in residential neighborhoods are not zoning compliant, due to height, density, or both.
What would the 100% Affordable Citywide Overlay look like in residential neighborhoods?

100% Affordable Housing developments in residential zoning districts would take the form of mid-rise multifamily buildings, consistent with the historic mix of densities found throughout Cambridge.

Examples of hypothetical buildout on medium-sized parcels (5,000sf – 10,000sf):

- Maximum allowed under current zoning (many existing buildings are non-compliant)
  2 units, 2 stories

- Example of buildout under 100% Affordable Citywide Overlay
  10 units, 3 stories

- Example of buildout under 100% Affordable Citywide Overlay
  12 units, 4 stories

69% of existing buildings in residential neighborhoods are not zoning compliant, due to height, density, or both.
What would the 100% Affordable Citywide Overlay look like in residential neighborhoods?

100% Affordable Housing developments in residential zoning districts would take the form of mid-rise multifamily buildings, consistent with the historic mix of densities found throughout Cambridge.

Examples of hypothetical buildout on large parcels (>10,000sf):

- **Maximum allowed under current zoning (many existing buildings are non-compliant)**: 1 unit, 2 stories
- **Example of buildout under 100% Affordable Citywide Overlay**: 17 units, 3 stories
- **Example of buildout under 100% Affordable Citywide Overlay**: 23 units, 4 stories

69% of existing buildings in residential neighborhoods are not zoning compliant, due to height, density, or both.
Analysis of Working Groups’ New Policy Ideas

How does the 100% Affordable Housing Citywide Overlay relate to the other new policy ideas that were tested?

• The 100% Affordable Housing Citywide Overlay does not change the number of units produced because affordable housing production is determined by the availability of funding.

• The number of City-subsidized affordable units is therefore the same under all of the other policy ideas that were tested.

• City funding typically allows 50-60 affordable units to be created through new construction and acquisition of existing multi-family properties each year.

Huron Ave. at Vassal Ln. has different densities together in close proximity.
Testing the impact of community-generated ideas

How do we test these ideas?

- Compare development projections through 2030 under current zoning and new policy ideas.
- Measure the hypothetical impact of these projections to enable a discussion about tradeoffs.

What’s the purpose of testing these ideas?

- To help analyze impacts of policy ideas and shape proposals.
- To compare the scale of change under different policies.
- To help in decision-making

These tests are analysis, NOT recommendations or proposals.

- They do not address the effects of all regulations. Zoning laws are always more nuanced than what we can test.
- They are not perfect predictions of what will occur. The tests are based on various assumptions, and we cannot predict how individual landowners will act or how the real estate market might change over time.
Development Projections
Methodology

1. Identify areas with high redevelopment potential

2. Determine development capacity under current zoning and new policy ideas
   - Determine soft sites by comparing existing density to what is allowed under zoning
   - Assign a buildout rate for each area
   - Assume a mix of uses consistent with the market in each study area

3. Incorporate approved growth projections for recent plans (Alewife, K2C2, North Point)

4. Determine impacts of new development on housing, jobs, traffic, urban form, energy, and tax revenue
Analysis of Working Groups' New Policy Ideas

Study areas for development projections
What to consider when evaluating new policy ideas: Housing

**Housing units:** Number of housing units created to meet citywide housing needs

**Affordable units:** Number of units created
Analysis of Working Groups’ New Policy Ideas

What to consider when evaluating new policy ideas: Urban Form

Context: How do existing surroundings inform the density and form of new development

Experience from the Street: How can new development help define the public realm
What to consider when evaluating new policy ideas: Jobs

Commercial space and jobs:
How many new jobs can be expected based on the amount of commercial space available
Super-Inclusionary Housing Program
What is a “super-inclusionary” housing program?

- Current inclusionary zoning requirements:
  - Mandates that 20% of new residential development is dedicated to affordable housing.
  - Gives a 30% density bonus

- Super-Inclusionary would be a voluntary program that provides a density bonus in exchange for additional affordable housing beyond the city’s current requirements
  - Like the existing policy, it would only apply to new residential buildings or conversions which create 10 or more new units or more than 10,000 square feet of residential space
Why study super-inclusionary housing program?

**Advances Envision Cambridge shared community goals:**
- Increase the overall housing supply and produce new affordable housing.
- Provide a variety of housing options for people of different socioeconomic levels, life stages, and physical needs.
- Expand affordable rental and homeownership opportunities to enable Cambridge to thrive as a mixed-income community.
- Foster neighborhoods of opportunity and equitable distribution of affordable housing citywide.
- Provide access to opportunities for all people regardless of differences.
- Work towards addressing race-based disparities and racial equity.
- Builds customer base for retail to attract and retain small businesses

**Other benefits:**
- Inclusionary Zoning is a major driver of affordable housing development
- Leverages private investment for public benefit (no public subsidy)
- City-regulated program
What would a Super-inclusionary Housing Program entail?

• A voluntary, tiered increase to allowable density in exchange for additional affordable housing
  – Each density bonus was set to the minimum amount that allows the additional market-rate units to subsidize the affordable units and ensure that the incentive is financially viable
  – Special permit rules would still apply

• Several different tiers of super-inclusionary incentives were tested:
  – Tier A is available in all parts of the city except traditional residential neighborhoods
  – In the areas where the character and access to amenities can support additional density, higher tiers are available in order to produce a higher percentage of affordable units

Tested tiers:

<table>
<thead>
<tr>
<th>Tier</th>
<th>Required Affordable Housing</th>
<th>Density increase over current zoning</th>
</tr>
</thead>
<tbody>
<tr>
<td>Current Inclusionary</td>
<td>20% of floor area (mandatory)</td>
<td>30% over base FAR (given)</td>
</tr>
<tr>
<td>Tier A</td>
<td>30% of floor area</td>
<td>70% over base FAR</td>
</tr>
<tr>
<td>Tier B</td>
<td>35% of floor area</td>
<td>100% over base FAR</td>
</tr>
<tr>
<td>Tier C</td>
<td>40% of floor area</td>
<td>130% over base FAR</td>
</tr>
</tbody>
</table>

The Super-Inclusionary Housing Program would not apply to traditional residential neighborhoods.
Super-inclusionary Housing Program: Adoption Rates

• Adoption rates for each tier would vary by the area of the city, depending on the allowable base density and rents that are achievable in each area.

• Not all developments would opt for the highest tier available to it.

• Not all developments would opt for any super-inclusionary bonus.

Tested adoption rates:

<table>
<thead>
<tr>
<th>Area</th>
<th>Buildout under Current Zoning: 20% Affordable</th>
<th>Tier A: 30% Affordable</th>
<th>Tier B: 35% Affordable</th>
<th>Tier C: 40% Affordable</th>
</tr>
</thead>
<tbody>

</tbody>
</table>
Super-Inclusionary Tiers Analyzed

Not all parcels in these areas will be redeveloped.
Comparison of Potential Housing Production – Super-Inclusionary

Existing housing stock: approximately 53,000 units

Notes: Affordable percentage for non-pipeline projects is assumed at 17.5% since 1) not all projects trigger IZ and 2) the IZ is 20% of square footage, not units. Given our emphasis on family sized units, the percentage of affordable units is likely to be less than 20% of total new housing units. All figures are rounded. Figures, including those for current zoning, will vary from past estimates due to changes in methodology. Figures include estimated affordable development that is funded through the City, in addition to the market and affordable development projected through this analysis.
Comparison of Potential New Residents and Public School Students

Figures, including those for current zoning, will vary from past estimates due to changes in methodology.
Analysis of Working Groups’ New Policy Ideas

Urban Form Comparison – Existing Built Density

Floor Area Ratio
- 0.0 - 2.0
- 2.1 - 4.0
- 4.1 - 6.0
- 6.1 +
Urban Form Comparison – Density Allowed by Current Zoning

Not all parcels in these areas will be redeveloped.
Urban Form Comparison – Max. Density under Super-Inclusionary

Not all parcels in these areas will be redeveloped.
Urban Form Outcomes: Hypothetical Corridor Block under Super-Inclusionary Program – Low Density

Study areas shown in the map have maximum super-inclusionary densities that might result in the density shown.
Urban Form Outcomes: Hypothetical Corridor Block under Super-Inclusionary Program – Medium Density

Study areas shown in the map have maximum super-inclusionary densities that might result in the density shown.
Urban Form Outcomes: Hypothetical Corridor Block under Super-Inclusionary Program – High Density

Study areas shown in the map have maximum super-inclusionary densities that might result in the density shown.
Analysis of Working Groups' New Policy Ideas

Urban Form Outcomes: Hypothetical Transitional Area under Super-Inclusionary Program – Existing Condition
Urban Form Outcomes: Hypothetical Transitional Area under Super-Inclusionary Program – Low/Medium Density

Study areas shown in the map have maximum super-inclusionary densities that might result in the density shown.
Urban Form Outcomes: Hypothetical Transitional Area under Super-Inclusionary Program – Medium/High Density

Study areas shown in the map have maximum super-inclusionary densities that might result in the density shown.
Analysis of Working Groups’ New Policy Ideas

Comparison of Potential New Jobs – Super-Inclusionary

Net New Jobs by Employment Location through 2030

- Buildout Under Current Zoning
  - Residential: 1,600
  - Lab: 14,900
  - Retail: 1,700
  - Commercial Office: 13,700
  - Total: 32,200

- Super-Inclusionary
  - Residential: 1,100
  - Lab: 11,400
  - Retail: 1,100
  - Commercial Office: 11,800
  - Total: 23,400

Job Type
- Residential
- Lab
- Retail
- Commercial Office

Existing employment: approximately 116,000 jobs

Figures, including those for current zoning, will vary from past estimates due to changes in methodology.

- Net new jobs are lower under the Super-Inclusionary Program because residential construction is incentivized compared to commercial.
- Buildout under either current zoning or the Super-Inclusionary Program would cause a net increase in the number of jobs in Cambridge.
Environmental Performance Incentive
What is an environmental performance incentive policy?

- A voluntary program that provides a density bonus in exchange for improved environmental building performance, such as:
  - Net zero construction ahead of the requirements set forth by the Net Zero Action Plan
  - Net positive construction after net zero construction is required
  - District energy
  - Resiliency measures

Current Net Zero Action Plan requirements by use:

<table>
<thead>
<tr>
<th>Type</th>
<th>Municipal</th>
<th>Small Residential (1-4 units)</th>
<th>Multifamily</th>
<th>Commercial</th>
<th>Institutional</th>
<th>Laboratory</th>
</tr>
</thead>
<tbody>
<tr>
<td>Target Year:</td>
<td>2020</td>
<td>2022</td>
<td>2025</td>
<td>2025</td>
<td>2025</td>
<td>2030</td>
</tr>
</tbody>
</table>
Why study an environmental performance incentive program?

**Advances Envision Cambridge shared community goals:**
- Prepare for impacts of climate change
- Accelerate net zero adoption
- Reduce building energy consumption
- Transition away from fossil fuels
What would the Environmental Performance Incentive entail?

- The incentive would require adoption of net zero construction for new buildings in the years before net zero is mandated, net positive construction after the mandates go into effect, or other measures that would increase environmental performance at a large scale.

- Limited to areas with highest likelihood of change (not available in traditional residential neighborhoods)

The Environmental Performance Incentive would not apply to traditional residential neighborhoods.
Environmental Performance Incentive Policy: Testing

- This analysis tested a version of a Environmental Performance Incentive bonus that offers a bonus to both residential and non-residential development

- Additional allowable density under this bonus:
  - Residential: 10%
  - Commercial: 15%

- Adoption of the bonus is assumed to be:
  - Residential: 70%
  - Commercial:
    - 40% in areas with higher density
    - 80% in areas with lower density
Comparison of Potential Housing Production – Environmental Performance Incentive

Existing housing stock: approximately 53,000 units

Notes: Affordable percentage for non-pipeline projects is assumed at 17.5% since 1) not all projects trigger IZ and 2) the IZ is 20% of square footage, not units. Given our emphasis on family sized units, the percentage of affordable units is likely to be less than 20% of total new housing units. All figures are rounded. Figures, including those for current zoning, will vary from past estimates due to changes in methodology.
